SOFTWARE DEVELOPER

+639277975100 | maurikfernandez123@gmail.com | <https://maurikfernandez-portfolio.vercel.app> | <https://github.com/Maurik>

Software Developer and BS Information Technology graduate with hands-on experience building, maintaining, and deploying production web, backend, and mobile applications. Experienced with Node.js, Express, React, Laravel, PHP, Flutter, MySQL, Firebase, and REST APIs. Built and supported business-critical operational systems and mobile applications serving real-world users, including a production mobile application deployed to 60,000+ existing users. Experienced in API integration, database-driven systems, production troubleshooting, and end-to-end feature delivery.

EDUCATION

Bachelor of Science in Information Technology | Major in Web and Mobile Technologies
Pangasinan State University – Urdaneta Campus | Graduated July 2026

PROFESSIONAL EXPERIENCE

Software Developer

When in Baguio, Inc. | May 2026 – August 2026

- Maintained and enhanced the production WIB V2 operations platform by implementing features, troubleshooting issues, and resolving bugs, keeping operational workflows reliable.
- Supported development and production deployment of the When In Baguio Eats mobile application across iOS and Android, including publishing iOS releases through Codemagic and resolving production issues.
- Centralized data from two separate databases into the main dashboard, enabling users to view and manage information from both sources within a single interface.
- Developed and integrated REST APIs and backend services using Node.js, Express, and MySQL, supporting communication between operational systems and applications.
- Applied AI-assisted development workflows to research solutions, implement features, and debug production issues while validating solutions against system requirements.

Full Stack Web Developer Intern

When in Baguio, Inc. | February 2026 – May 2026

- Rebuilt the WIB V2 operations and dispatch platform by migrating the legacy Yii/PHP system to Node.js, React, MySQL, Firebase, and cPanel, modernizing the platform from the ground up.
- Developed core order, merchant, rider, notification, and payment workflows, supporting the company's live food-delivery operations.
- Engineered backend services and REST APIs using Node.js, Express, and MySQL, connecting operational modules and data workflows across the platform.
- Applied AI-assisted development workflows for technical research, implementation, debugging, and rapid iteration, accelerating development while validating generated solutions against project requirements.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Dart, SQL, HTML5, CSS

Frontend & Backend: React, Flutter, Tailwind CSS | Node.js, Express.js, Laravel, PHP

APIs & Integration: REST APIs, API Integration, JSON, GraphQL

Databases & Services: MySQL, PostgreSQL, Firebase (Firestore, FCM, Auth), PayMongo

Development: Full-Stack Development, Database Design, CRUD Systems, Debugging, Testing, Production Deployment

Tools: Git/GitHub, Postman, Vercel, cPanel, Codemagic, Figma

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, Codex, ChatGPT, AI-Assisted Research & Debugging

CERTIFICATIONS

- **Microsoft Azure AI Essentials Professional Certificate** – Microsoft & LinkedIn | Issued August 2026
- **Generative AI Productivity Skills** – Microsoft & LinkedIn | Issued August 2026

PROJECTS

WIB V2 — Operations & Dispatch Platform

Node.js | React | MySQL | Firebase | cPanel

- Rebuilt the operations and dispatch platform by migrating the legacy Yii/PHP system to Node.js, React, MySQL, Firebase, and cPanel, establishing the foundation for the company's modern operational platform.
- Engineered order, merchant, rider, notification, and payment workflows, supporting the end-to-end operational requirements of a live food-delivery business.
- Optimized MySQL data retrieval with keyset pagination, achieving sub-100ms response times for targeted high-volume operational queries.
- Automated discrepancy tracking by replacing manual Excel input with event-triggered updates for order changes, payment changes, and cancellations, reducing manual data entry.
- Centralized data from two database tables into a unified dashboard, enabling users to manage information from both sources within a single interface.
- Implemented dynamic system settings connected to the When In Baguio Eats application, enabling operational configurations to be managed through the platform.

When In Baguio Eats — Customer Mobile App (iOS & Android)

Flutter | Dart | Firebase | Node.js | cPanel

- Supported development and modernization of the production customer application for iOS and Android, contributing to a V2 release deployed to 60,000+ existing users.
- Developed restaurant discovery, cart management, checkout, payment, and push-notification features, supporting the app's end-to-end food-ordering experience.
- Implemented Provider-based state management with offline-first cart persistence, preserving cart data across application lifecycles.
- Integrated GCash and PayMongo QR checkout with webhook-based payment verification and PDF receipt generation, enabling reliable payment confirmation.
- Configured and deployed iOS releases through Codemagic and supported production releases across the App Store and Google Play.
- Implemented FCM notification routing with local caching and deep-link navigation, connecting users directly to live order-tracking workflows.

CLICK2SERVE — Smart Municipal Information Kiosk

Laravel | PHP | MySQL | JavaScript Tailwind CSS

- Built a touchscreen kiosk and citizen web portal for Alaminos City Hall, integrating queue management, AI-assisted FAQs, and 3D department navigation to provide self-service access to city-hall information.
- Engineered service-request workflows, ticket queue state management, officer dispatch dashboard, and super-admin functionality using Laravel and MySQL, digitizing key municipal service processes.
- Developed an AI-powered FAQ chatbot using Dialogflow, providing automated responses to common city-hall inquiries.
